

PRODUCT DATA SHEET

Microcool MC 250

LAUDA Microcool has been designed as a circulation chiller line with five compact models and cooling capacities from 0.25 to 1.2 kW. The user interface with large LED display and the membrane keyboard make the devices easy to use. An RS-232 interface and alarm contact are integrated as standard. What is unusual in this price category of circulation chillers is the high-quality block pump with magnetic coupling. The magnetic coupling of pump and electric motor exclude sealing problems on the pump shaft. LAUDA Microcool circulation chillers are used wherever heat needs to be dissipated reliably and fast, e. g. in laboratories for rotary evaporators, distillation systems or analytical devices.

Working temperature min.
-10 °C

Working temperature max.
40 °C
