DIVISIONSIZEGUIDE

The division size guide is a handy tool to quickly and easily check the diameter of any test tube or glass bottle. The hole sizes range from 10mm up to 30mm.

DIVIDED TRAYS

When ordering divided trays using this guide remember the size of the cap or lid must past through the hole. The size of hole that the tube passes through is the size of cell that is required when ordering. See pages 12 - 13 for details, divided trays and ordering information.

TEST TUBE RACKS

When ordering test tube racks please state the cap size and bottle size and we will design a rack to meet your requirements. See pages 18 - 19 for details on selecting the correct test tube rack and ordering information.

ORDERING INFORMATION

Delivery: Direct sales free of charge (available in UK, Ireland, France, Netherlands, Belgium, Germany).

Worldwide distribution.

Order acknowledgements will be returned within 12 hours.

Prices are subject to change at any time without notice.

Enquiries welcome: Monday to Friday 8.00am to 4.30pm

Order online at

ABOUT US

Wesbart is a family run company, founded in 1979, that specialises in designing and manufacturing aluminium and stainless steel sample storage systems for laboratories, hospitals, universities and the pharmaceutical industry across the globe.

We have an extensive range of over 10,000 products which is expanding all the time. We offer storage systems for all upright and chest freezers on the market. We also manufacture additional laboratory items which include test tube racks, divided trays, cold room racking, storage bins, canisters and blood bag cassettes. We also offer a range of consumable goods which can be purchased with racking systems, these include cryoboxes, cryogenic vials, specimen storage jars and petri dishes. Samples can be provided free of charge if required.

Wesbart's friendly team of staff take pride in their reputation for producing high quality goods with a high standard finish. With over 40 years of experience as an established manufacturing business, our confidence is such that we offer a 3 Year Warranty on all our aluminium and stainless steel products. We are also aware price can be an important factor when buying racking therefore we offer competitive prices. We believe we offer the largest range of racking on the market at the best price and quality ratio.

Good quality customer service is very important to us, our sales team are happy to discuss individual requirements and help design a bespoke product. Products have a 3-4 week lead time, however we understand some orders can be urgent and we will do everything we can to ensure you receive your order as soon as possible.

Some of our products are listed in this catalogue. A larger range of products appear on our website where you can also complete a quotation request. We will provide you with a quotation within 24 hours.

UPRIGHT FREEZER RACKS

FRONT ACCESS

Horizontal cold stores (HCS) are placed on the shelves of upright freezers and hold trays or storage bins. Horizontal outers have access from the front, also known as front access racks. The benefits of a front access rack means the user only has to remove one tray to gain access to the item required, while side access racks mean the user has to remove the whole unit from the freezer. Horizontal cold stores are manufactured from aluminium or stainless steel. They can be made in any size to suit the requirements of the end user. Most horizontals are designed to accommodate trays which hold cryoboxes or microtiter plates. Divided trays can also be stored in a horizontal which can maximize the usage from the freezer.

Stainless steel horizontal with trays **AH506/4TSS**

Horizontal units are available in a range of different designs. Most horizontal outers hold between 3 and 7 trays, however the size of a unit can be designed to fit any freezer. The size of the aperture depends on the size of the item wished to be stored. Wesbart are able to design a rack which has different size apertures, or with removable shelves thereby allowing for different size items to be stored in the same unit.

Dimensions (mm)	Box Size / Boxes Per Rack	Part Number
295h x 145w x 290d	4" (100mm) / 4	AH274/2T
295h x 145w x 290d	3" (75mm) / 6	AH274/3T
295h x 145w x 290d	2" (50mm) / 10	AH274/5T
420h x 140w x 560d	4" (100mm) / 12	AH179/3UT
420h x 140w x 560d	3" (75mm) / 20	AH179/5UT
420h x 140w x 560d	2" (50mm) / 28	AH179/7UT
235h x 141w x 560d	2" (50mm) / 16	AH506/4T
235h x 141w x 560d	3" (75mm) / 12	AH506/3T
290h x 140w x 560d	2" (50mm) / 20	AH039/5NMT
340h x 140w x 560d	2" (50mm) / 24	AH073/6NMT
230h x 140w x 560d	2" (50mm) / 16	AH940/4NMT

Also available in stainless steel.

HOW TO FIND THE CORRECT RACKING FOR YOUR FREEZER

Need help finding the correct racking for your freezer? Try our online reference guide at www.wesbart.co.uk

HINGED CRYOBOX RACKS

Aluminium or stainless steel front access racks supplied with trays specially designed to hold 100 cell hinged cryoboxes, these racks are suitable for upright freezers. All racking is suitable for cryoboxes 63h x 141 x 151

Boxes Per Rack	Rack Dimensions (mm)	Part Number
4	175h x 150w x 420d	BH300/2NMT
6	175h x 150w x 560d	BH301/2NMT
9	235h x 150w x 560d	BH302/3NMT
12	287h x 150w x 560d	BH303/4NMT
16	287h x 150w x 645d	BH304/4NMT
18	415h x 150w x 645d	BH305/6NMT
12	235h x 150w x 645d	BH306/3NMT

Part numbers listed are aluminium, to order stainless steel racks add 'SS' to the end of the part number. (Aluminium rack: **BH300/2NMT**, stainless steel rack: **BH300/2NMTSS**)

BESPOKE RACKS

Should you require a bespoke rack please visit our website (www.wesbart.co.uk) to fill in a quotation request. The information that will be required is the freezer make and model, maximum internal size of the shelf and the size of the item you require racking.

COMPATIBLE CRYOBOXES

Wesbart also offers a large range of cryoboxes suitable for these racks. For cardboard boxes please turn to page 32. For plastic boxes please turn to page 34. For hinged boxes please turn to page 36.

Aluminium front access rack **BH304/4NMT**

Bespoke lockable front access rack **HCS4584/140LOCK**

UPRIGHT FREEZER RACKS

SIDE ACCESS

Side Opening Horizontal units also known as side access racks, fit onto shelves of upright freezers to hold cryoboxes or microtiter plates. Side access racks feature a handle on one end to remove it from the freezer, these racks are best suited for longer term storage. Side access racks are manufactured from aluminium or stainless steel. Side access racks can be any size to meet the requirements of the user. They can also feature a locking rod to hold items in place, and have a handle fitted to the top to make the unit easier to transport.

Aluminium racks to hold boxes 133w x 133d (mm)

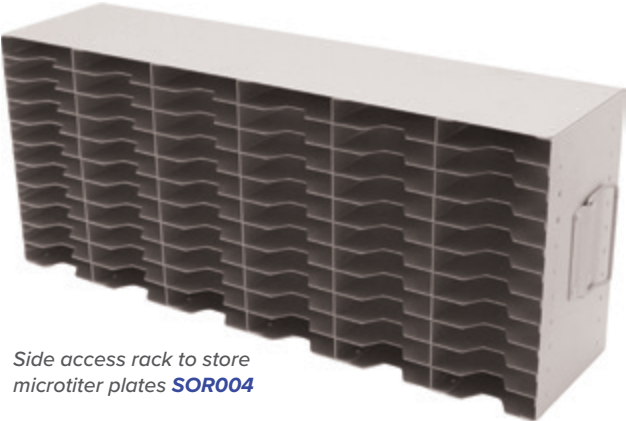

Dimensions (mm)	Box Size / Boxes Per Rack	Part Number
295h x 145w x 290d	4" (100mm) / 4	SOR455
295h x 145w x 290d	3" (75mm) / 6	SOR453
295h x 145w x 290d	2" (50mm) / 10	SOR110
420h x 140w x 560d	4" (100mm) / 12	SOR304
420h x 140w x 560d	3" (75mm) / 20	SOR368
420h x 140w x 560d	2" (50mm) / 28	SOR090
235h x 141w x 560d	2" (50mm) / 16	SOR196
235h x 141w x 560d	3" (75mm) / 12	SOR197
290h x 140w x 560d	2" (50mm) / 20	SOR032
340h x 140w x 560d	2" (50mm) / 24	SOR033
230h x 140w x 560d	2" (50mm) / 16	SOR196
287h x 140w x 685d	2" (50mm) / 25	SOR462

Also available in stainless steel.

Side access rack to store 2" box **SOR196**

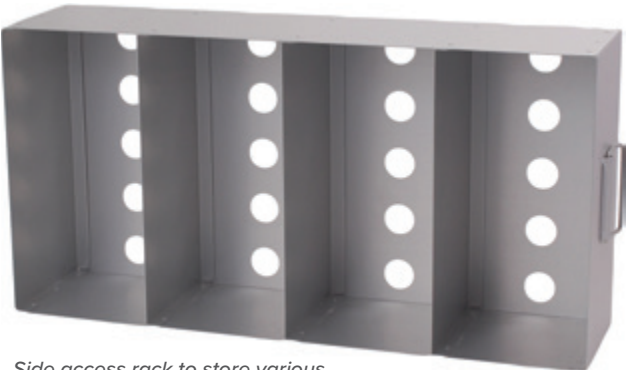

Wesbart also offers a very popular adjustable side access rack which offers the user flexibility to store different size boxes. Using the unique design of this rack the user can set the removable shelves to store either 16x 2" boxes, 12x 3" boxes or 8x 4" boxes. *Part Number SOR002*

Side access rack to store microtiter plates **SOR004**

HOW TO FIND THE CORRECT RACKING FOR YOUR FREEZER

Need help finding the correct racking for your freezer? Try our online reference guide at www.wesbart.co.uk

Side access rack to store various height boxes **SOR002B**

HINGED CRYOBOX RACKS

Aluminium or stainless steel side access racks specially designed to hold 100 cell hinged cryoboxes, these racks are suitable for upright freezers. All racking is suitable for cryoboxes 63h x 141 x 151

Boxes Per Rack	Rack Dimensions	Part Number
4	175h x 150w x 420d	SOR535
6	175h x 150w x 560d	SOR536
9	235h x 150w x 560d	SOR537
12	287h x 150w x 560d	SOR538
16	287h x 150w x 645d	SOR539
18	415h x 150w x 645d	SOR540
12	235h x 150w x 645d	SOR541
28	420h x 160w x 590d	SOR285

Part numbers listed are aluminium, to order stainless steel racks add 'SS' to the end of the part number. (Aluminium rack: **SOR535**, stainless steel rack: **SOR535SS**)

Side access rack to store hinged cryoboxes **SOR285**

BESPOKE RACKS

Should you require a bespoke rack please visit our website (www.wesbart.co.uk) to fill in a quotation request. The information that will be required is the freezer make and model, maximum internal size of the shelf and the size of the item you require racking.

Bespoke lockable side access rack **HCSO220LOCK**

COMPATIBLE CRYOBOXES

Wesbart also offers a large range of cryoboxes suitable for these racks. For cardboard boxes please turn to page 32. For plastic boxes please turn to page 34. For hinged boxes please turn to page 36.

TRAYS

All trays are made in aluminium or stainless steel and can be designed in any size or shape. There are many options of trays available, each tray is designed to store different items. The basic trays we offer are to accommodate 133 x 133 cryo boxes, tray lengths are designed to take 2 - 6 boxes per tray.

Trays can be designed in any size and designed to suit the needs of the user.

The most basic tray we offer is a flat tray with 13mm sides and dimples on the base to stop the tray sticking. This tray is ideal for longer term storage. The most popular tray we offer has a hand grip on the end to allow easier access to the tray contents. Trays can be fitted with plastic engraved labels or label holders to easily identify them, screen printing is also available if required.

Other trays we offer can have high sides, ideal for stacking items on top of each other without them falling when the tray is removed. High sided trays can be fitted with lids which can be lockable, if required. Inserts can be placed into a high sided tray to store bottles or vials.

To make it easier for the user to remove items from the tray there is an option to have holes in the base to push items through or have a bridge to hold items in place and stop them sliding backwards and forwards when the tray is not full, this works very well when storing microtiter plates.

Welded and leak-proof trays are available in any size required. See website for details (www.wesbart.co.uk)

We also offer a range of finishes for trays, colours available include black, red, gold, blue and purple

Basic 13mm Tray

Front Hand grip Tray 50mm Sides

Front Label Tray

Front Hand grip Tray

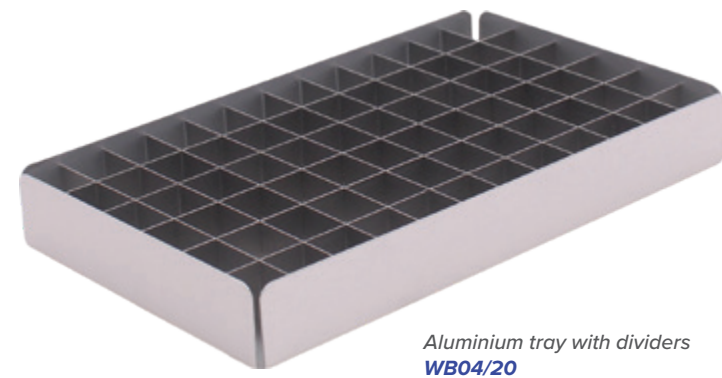

DIVIDED TRAYS

Divided trays are designed to be placed within a horizontal/ vertical cold store or be free standing. The body of the tray is available in anodised aluminium or stainless steel, dividers are made from 0.5mm aluminium and are not anodised.

The standard size cells we offer are; 10, 12, 13, 14, 16, 18, 20, 24, 30mm and other sizes are available on request. Use the division guide on the inside cover to check the size of the test tube you wish to store. As the cells have no spacing in between remember to accommodate for the cap or lid size too.

Aluminium trays are available in a range of colours including; black, red, gold, blue and purple. Should you require a coloured tray please contact our sales team for a quotation.

We can design a bespoke storage tray if your sample is an unusual size or shape, divided trays can have different height divisions to accommodate this. Trays can be any height and have a lid if required. Screen printing on the side of the tray is an effective way of labelling the cells.

Aluminium tray with dividers
WB04/20

Safety edge tray with divisions
WB12/30

The standard range of divided storage trays are available in the table below. These trays are supplied in anodised aluminium, should you require a stainless steel tray add 'SS' to end of the part number. All trays are 34mm high.

3 SIMPLE STEPS

TO CHOOSING A WESBART STORAGE TRAY

1. Select the required overall width and length of the tray in column **A** and the appropriate tray part number in column **B**

2. Select the required cell size in column **C**. Remember that the tube or vial cap may be larger than the body.

3. Column **C** gives the storage capacities of individual trays together with their layouts.

From this it is possible to calculate the storage capability of a specified number of trays, or the number of trays required to store a quantity of tubes.

To order a storage tray first give the tray code number followed by the division size

For example a tray 154mm x 154mm with 14mm divisions = **WB08/14**

Overall Size	Part Number	C									
		10mm	12mm	13mm	14mm	16mm	18mm	20mm	24mm	30mm

STORAGE BINS

Storage bins are a useful way of keeping loose items safe within a freezer. Storage bins are manufactured from anodised aluminium or stainless steel. All storage bins have either a fold down handle or hand grip. Bins can be designed to have a handle on each end for transport if required. All storage bins are fitted with a label holder so the user can easily identify which bin they require. Storage bins can be designed to fill the height of any freezer compartment or be smaller and stored in a horizontal cold store (see page 6).

Storage bins can be manufactured to any size required, our standard size bins are 140mm wide and 280mm wide however many more are available, visit our website to view the most popular range of storage bins.

Drop on lids and hinged lids are also available if required and can have an option to be locked to keep items inside safe. Inserts can be added to the storage bins to divide it into sections making it easier to separate items.

If you require an aluminium storage bin it can be produced in a range of colours including black, red, gold, blue and purple. Aluminium bins are considerably lighter than stainless steel which makes them easier for transportation.

ORDERING INFORMATION

All bins are supplied with a handle or hand grip and label holder. If you require your storage bin in stainless steel add 'SS' to the end of the part number.

Storage Bin Size	Part Number
235h x 175w x 560d	BIN 180
200h x 195w x 560d	BIN 186
140h x 400w x 400d	BIN 255
280h x 270w x 560d	BIN 475
400h x 205w x 560d	BIN 506
130h x 160w x 560d	BIN 560
235h x 145w x 560d	BIN 580
235h x 140w x 560d	BIN 581
235h x 180w x 560d	BIN 585
200h x 500w x 620d	BIN 634

Storage bin with dividers **BIN 506D**

Storage bin **BIN 404**

Storage bin with lid **BIN 581**

HORIZONTAL DRAWER SYSTEMS

If a single storage bin designed to fit a freezer shelf is too large the other option is to have smaller bins that fit into horizontal outers. These drawers are smaller than storage bins and are better suited for storing small loose items but can also be used for cryoboxes bottle or jars.

Horizontal drawer systems are sold complete and are manufactured in aluminium or stainless steel. There are many different options of design for a horizontal drawer system. All drawers come complete with a handle or hand grip for easy use and a label holder to identify the contents. Drawer systems can have any amount or size drawer depending on the requirements for the user. Drawers can have special features such as handles on each end to make transporting the drawer easier or have dividers fitted to organise items.

Aluminium drawer systems are available with different coloured handles which include black, red, gold, blue and purple to help differentiate between drawers.

Horizontal Drawer System **AH178/2DR**

Horizontal Drawer System **AH692/2DR**

Stainless steel horizontal drawer system **AH179/2DRSS**

BESPOKE STORAGE

Should you require a bespoke designed drawer system or storage bin please visit our website to complete a quotation request. The details that will be required for a quotation are the freezer make and model or the internal compartment size and any details on the size of items to be stored.

Number Of Drawers	Outer Dimensions (mm)	Part Number
2	290H X 280W X 560D	AH202/2DR
3	290H X 280W X 560D	AH202/3DR
2	340H X 280W X 560D	AH692/2DR
3	340H X 280W X 560D	AH692/3DR
2	250H X 210W X 560D	AH998/2DR
3	250H X 210W X 560D	AH998/3DR
2	420H x 140W x 560D	AH179/2DR
3	420H x 140W x 560D	AH179/3DR
2	420H x 205W x 560D	AH178/2DR
3	420H x 205W x 560D	AH178/3DR

Also available in stainless steel.
To order add SS to the end of the part number

VERTICAL COLD STORES

Vertical cold stores can be designed to fit any chest freezer or liquid nitrogen vessel (for storage in liquid nitrogen please go to page 24).

Vertical cold stores come in many different designs and sizes the most popular design is to store cryoboxes, they are available from aluminium or stainless steel. All standard verticals have solid sides or a wraparound body for increased strength there are holes in the back of the unit to push the cryobox out. Verticals are fitted with a fold down handle to allow easy access to remove the unit from the chest freezer. There are different handle designs depending on what is required, a fold down is the most common and available in a 90-degree version to allow more space for the user to access the handle when wearing gloves. Fixed handles are also available which are always in the upright position, the disadvantage of a fixed handle is it can take up extra space within the freezer.

For standard size racks please see the table below or freezer reference guide towards the back of this catalogue, should you require a bespoke rack please complete a quotation request on our website. We will require the details of the make and model of the freezer along with the box size to be stored.

RACKS FOR CRYOBBOXES (133mm x 133mm)

Dimensions (mm)	Box Size / Boxes Per Rack	Part Number
751h x 139w x 136d	2" (50mm) / 13	VC225/13
751h x 139w x 136d	3" (75mm) / 9	VC225/9
751h x 139w x 136d	4" (100mm) / 7	VC225/7
725h x 138w x 142d	2" (50mm) / 13	TWK1SC
725h x 82w x 85d	2" (50mm) / 13	TWK2SC
580h x 140w x 140d	2" (50mm) / 10	CS93/10NL
515h x 140w x 140d	2" (50mm) / 9	VC138/9NL
403h x 140w x 140d	2" (50mm) / 7	VC360/7NL
580h x 140w x 140d	3" (75mm) / 7	CS93/7NL
519h x 140w x 140d	3" (75mm) / 6	VC138/6NL

To hold cryoboxes in place there are many different options. A locking bar is the most cost effective option and is most popular for the cost focused end user. Other options include a 3mm lip on the front of the shelf, this holds the boxes and stops them falling forwards, however this will not hold them if the vertical is turned completely on its side. Spring clips are another option to hold boxes, a spring clip is fitted to the side of the vertical and when the box is inserted the clip presses against it holding it in place. Spring clips are capable of holding boxes in place even when the vertical is lying face down. To remove the box, the user has to push it out through the back of the vertical. The spring clip stays fitted to the vertical and is ready when the box has to be returned.

Vertical cold stores can be fitted with engraved labels and coloured handles to help identify them, the following colours are available, black, red, gold, blue and purple.

Wesbart also offer a range of vertical racks for the storage of 100 cell hinged cryoboxes, these racks are suitable for chest freezers. All racks feature a locking bar to hold the boxes in place. Racks also available in stainless steel.

RACKS FOR HINGED CRYOBBOXES (141mm x 155mm)

Box height	Boxes Per Rack	Rack dimensions	Part Number
63 mm	10	655h x 150w x 160d	VC055/10DB
63 mm	6	410h x 150w x 160d	VC301/6DB
57 mm	13	765h x 150w x 160d	VC316/13DB
57 mm	7	430h x 150w x 160d	VC321/7DB
57 mm	12	730h x 150w x 160d	VCSA77/12DB

Vertical cold store with spring clips

Vertical cold store with locking bar and label

TEST TUBE RACKS

Test Tube racks are an effective way of storing Falcon/ Universal tubes, Bijoux, cryogenic vials or any size glass bottles. Racks are available in aluminium and stainless steel with the option of a hand grip. Test Tube racks can be designed to fit in horizontal cold store or be free standing. The standard size holes we offer are; 10, 12, 13, 14, 16, 18, 20, 24, 30mm and other sizes are available on request. Different size test tubes racks are available to suit your requirements. Test tube racks are available in colours such as black, red, gold, blue and purple, labels can be fitted to racks so they can be easily identified.

ORDERING INFORMATION

The part number below is an example of a single platform rack with 12x 30mm Holes (shown on the page opposite).

Add ‘**HG**’ to the end of the part number if you require a Hand grip and ‘**SS**’ if you would like stainless steel.

Visit our website (www.wesbart.co.uk) for further details, prices and orders.

HOW TO FIND THE TEST TUBE RACKS FOR YOU

Use the division size guide located on the inside cover of the catalogue to find the size hole you require. Decide the layout and size you require the rack to be, if you require the rack to fit in an existing horizontal cold store you will need to quote the size of the shelf. We can design any size rack with any layout of holes.

SINGLE PLATFORM

Single Platform test tubes racks are ideal for storing short flat bottomed test tubes. The height of a single platform rack ranges from 22 - 42 mm. Please provide information of the height of the test tube to be stored when ordering.

Hole Diameter	Format	Capacity	Height (mm)	Length (mm)	Width (mm)	Part Number
7	5 x 10	50	28	127	62	SP0750

Double platform test tube rack **DP1860**

Double platform test tube rack in stainless steel **DP3070SS**

TRIPLE PLATFORM

Triple Platform Racks are best for storing tall items. The standard size holes we offer are; 10, 12, 13, 14, 16, 18, 20, 24, 30mm and other sizes are available on request. A triple platform rack offers more support to taller items so they are more stable. Racks are made in aluminium or stainless steel.

Visit our website for a list of the most popular Triple Platform racks we offer.

Hole Diameter	Format	Capacity	Height (mm)	Length (mm)	Width (mm)	Part Number
11	3 x 10	30	90	214	68	TP1130
14	2 x 10	20	90	210	52	TP1420
18	2 x 10	20	90	233	53	TP1820
18	5 x 10	50	90	233	120	TP1850

20	5 x 12	60	90	336	140	TP2060
30	10 x 10	100	90	366	366	TP30100

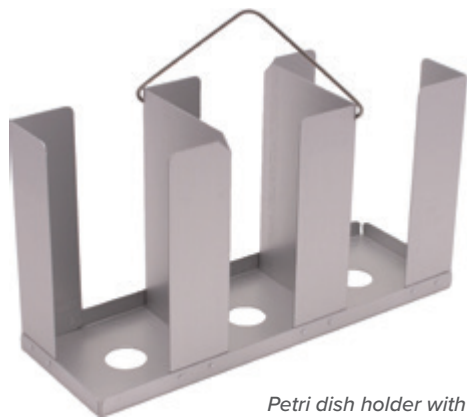

Other hole sizes available on request

Triple platform test tube rack **TP30100**

PETRI DISH HOLDERS

Petri dish holders can be made from 1mm anodised aluminium or 0.7mm stainless steel. The design includes a fold down stainless steel handle for transport, there is the option to have an engraved label or label holder fitted to identify the unit. The base of the unit can be flat or inverted depending on the specification required. Aluminium petri dish holders are available in a variety of colours including, black, red, gold, blue and purple.

Petri dish holder with handle **PT30F**

Stainless steel petri dish holder with handle **PT30SS**

Petri dish holder with handle **PT60**

Petri dish holders can be used for storing a range of different size petri dishes. The most popular design is the PT30 which holds 30x 100mm dishes other varieties are available such as the PT45 which holds 45 or the PT60 which holds 60x 55mm dishes.

ORDERING INFORMATION

Add ‘**F**’ to the end of the part number if you require a flat base, ‘**LH**’ to the end for a label holder, and ‘**SS**’ if you would like stainless steel.

Visit our website (www.wesbart.co.uk) for further details, prices and orders.

Capacity	Dimensions (mm)	Part Number
30 x 90/100mm dishes	170h x 110w x 325d	PT30
30 x 90/100mm dishes	170h x 110w x 325d	PT30F
30 x 90/100mm dishes	170h x 110w x 325d	PT30LH
30 x 90/100mm dishes	170h x 110w x 325d	PT30SS
40 x 90/100mm dishes	175h x 202w x 202d	PT40
45 x 90/100mm dishes	250h x 110w x 325d	PT45
60 x 55mm dishes	175h x 130w x 130d	PT60
60 x 55mm dishes	175h x 130w x 130d	PT60F
60 x 55mm dishes	175h x 130w x 130d	PT60LH
60 x 55mm dishes	175h x 130w x 130d	PT60SS

Should you not be able to find the petri dish holder you require, visit our website to fill in the quotation request.

Petri dishes and contact plates are also available in a variety of sizes. Please visit our website for prices and ordering.

TRANSPORT BOXES

Wesbart transport boxes are manufactured from 1.5mm anodised aluminium with leak-proof welded seams. They feature a heavy duty fold down handle meaning the boxes are stackable. The lid of a transport box can be hinged or removable. All boxes are autoclavable up to 200 degrees.

Transport boxes are fitted with stainless steel safety catches which can be lockable. The handle automatically locks in the upright position to prevent the box from swinging and damaging the contents. Transport boxes have the option to be fitted with a silicone gasket on the lid to tightly seal.

Transport box with side handles

Transport box with upright handle

Transport boxes can be designed in any size to meet the requirements of the user, please visit our website (www.wesbart.co.uk) to request a quotation.

FREEZER FRAMES

Freezer frames fit neatly into the freezer once shelves have been removed and are available in any size/ design required. Drawers can be any size designed to store the maximum number of samples, these drawers are fitted to smooth running maintenance free runners. Drawers are available in aluminium or stainless steel. Frames can be designed to hold large dividers ideal for blood bag storage.

Freezer frames can also be used in cold rooms alongside cold room racking or be free standing in laboratories. Freezer frames are shipped complete with all drawers in place and ready to use. Wesbart do also offer a fitting service for freezer frames. For a bespoke design freezer frame please visit our website to complete a quotation request.

COLD ROOM RACKING

Cold room racking is an effective way of getting the maximum storage of items in a small space. Our cold room racking is a bespoke design to accommodate all the needs for the end user. We are able to design a section of free standing racking onto which smaller racks and trays are placed. Cold room racking can also be used to store bins or loose items.

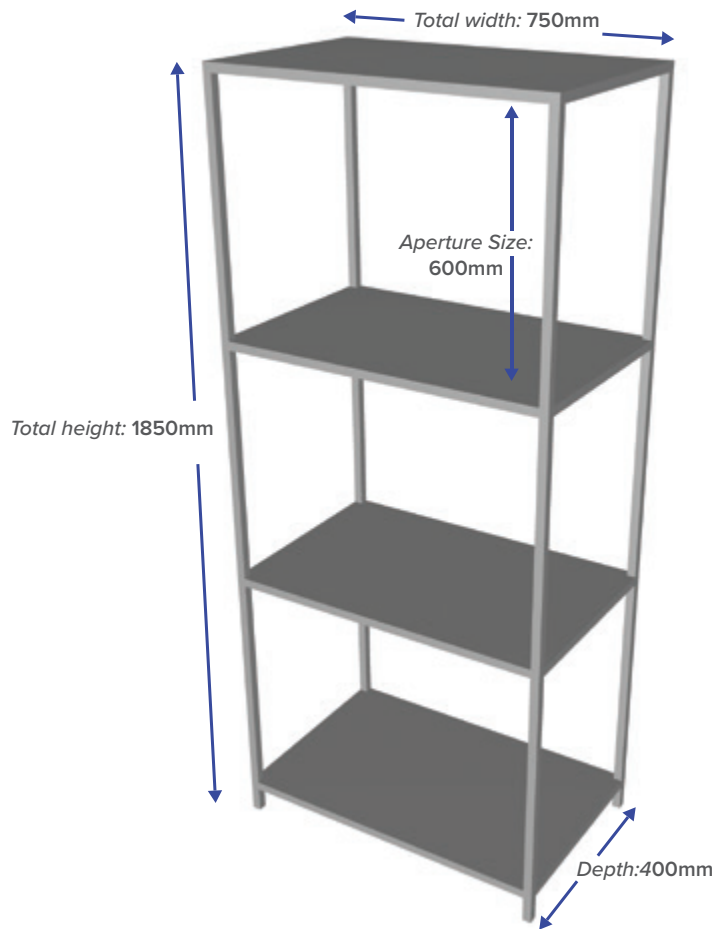

All frames are made from stainless steel uprights and fitted with brushed stainless steel shelves for increased strength and durability.

All cold room racking is delivered and fully installed. This service is available across mainland U.K. only.

If you require a cold room quotation, please visit our website for more details most cold room quotes require an inspection. We are able to provide a layout for the racking and CAD drawings of the racks to give you a visual guide.

A recent installation of a cold room racking system at The Pirbright Institute.

This system was designed with the customer to store a custom designed tray to hold samples.

CRYOGENIC STORAGE

On the following pages we have a wide range of products specifically designed to work in cryogenic storage vessels. These items include vertical cold stores for storage of cryo boxes, base plinths and frames, canisters for straw storage and cassettes for storing blood bags. We offer a large range of items for cryogenic vessels and understand each user's requirements are different. Should the items you require not be listed in this catalogue please visit our website to complete a quotation request.

HOW TO FIND THE CORRECT RACKING FOR YOUR FREEZER

Need help finding the correct racking for your cryogenic vessel? Please see the reference guides on page 61, or for a large range of racking try our online reference guide at www.wesbart.co.uk

VERTICAL COLD STORES

Verticals for storage in cryogenic vessels are similar to the verticals used in chest freezers. They are available with locking rods, spring clips, shelf lips and labels. They are manufactured in aluminium or stainless steel. Vertical cold stores for cryogenic vessels are also available with adjustable shelves ideal for storing different size microtiter plates. The shelves can be easily removed and re-positioned to store different size items. Verticals are also available with different size apertures depending on your requirements.

Verticals can be fitted with doors which are useful when storing blood bags to hold the bags in position. Cassette carriers are designed to hold aluminium cassettes in individual compartments, these can also be fitted with a door to retain the cassettes.

For a quotation for a bespoke rack please visit our website (www.wesbart.co.uk) to fill in a quotation request.

PLINTHS

Plinths are used for vapour phase vessels to stop items being submerged in the liquid. Plinths are supplied in two halves and placed on the base of the vessel. Plinths are available in aluminium or stainless steel and have holes in to allow the vapour to circulate effectively around the vessel.

If the item being stored is a vertical cold store, we offer an option to blank off the bottom apertures of the unit which would sit in the liquid.

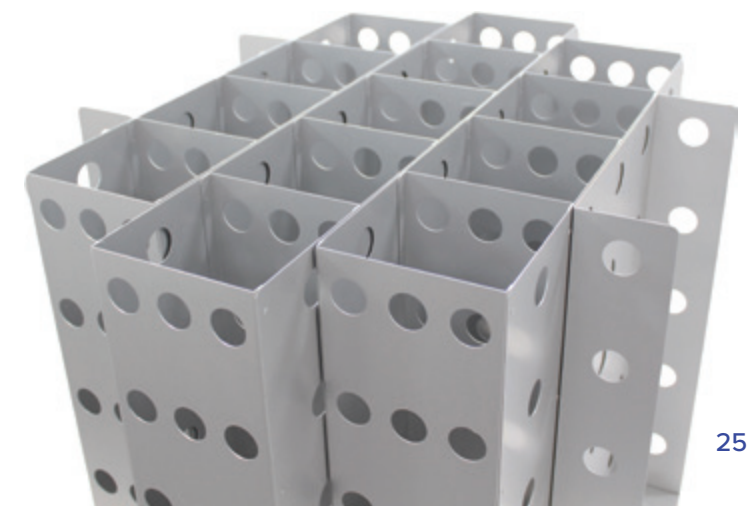

FRAMES & BLOOD BAG BOXES

Frames are an effective way of storing blood bag boxes in liquid nitrogen vessels. Frames are manufactured in aluminium or stainless steel. They are designed in sections so they are easy to fit in the vessel. Frames have 30mm holes to allow the circulation of liquid nitrogen. The design of a frame depends on what the user wishes to store and can be designed to fit all liquid nitrogen vessels on the market. Vapour phase vessels frames are designed to hold items above the liquid level.

Blood bags are the most popular item to be stored in a frame system. Blood bags are placed into boxes which fit neatly into the frame maximizing the storage use of a vessel.

If you require a quote for a frame, plinth or vertical to store items in a liquid or vapour phase vessel please visit our website to complete a quotation request.

CANISTERS

Canisters are an effective way to store goblets in all types of liquid nitrogen and vapour freezers. Canisters are made from anodised aluminium tube for increased strength. The base of the canisters is perforated to allow for air flow. The standard size canisters have a diameter of 70mm or 75mm and can be designed at any length required.

All canisters come with stainless steel lifters to allow easy use to remove the goblets quickly with gloves on. There are two different lifter designs, the 70mm diameter canisters can only take the basic lifter whereas the 75mm can take a sectioned lifter. Lifters are available with labels to help identify them.

The table below shows the number of canisters to be stored in a range of Taylor Wharton vessels. For Vapour vessels we recommend a base plinth (see page 25). Should you require canisters for a vessel not listed below please visit our website to complete a quotation request.

Vessel	Phase	Number of 70mm Canisters	Goblets per Canister	Part Number

AI-91K 6 sections	Vapour	306	2	CAN014

Visit our website (www.wesbart.co.uk) for further details, prices and ordering.

BLOOD BAG CASSETTES

Cassettes are a safe way of storing and protecting blood bags. When dropped the design of the cassette protects the blood bag by absorbing the shock. Cassettes are manufactured in aluminium but are also available in stainless steel.

Wesbart is an approved supplier for Maco Pharma blood bag cassettes. These cassettes have been designed in partnership with Maco Pharma to meet their requirements of strength and durability. Below is a table matching the Maco Pharma blood bag to the cassette required to store it.

These cassettes have a wing on the top and a window to see the label on the bag.

Part Number	Compatible with Maco Pharma ref.
CAS-0010AU	GSR0501AU
CAS-1000AU	GSR1000AU
CAS-5020AU	GSR2001AU, GSR5001AU, GSR7001AU
CAS-7010AU	GSR7000AU
CAS-5020AU	GSR7003AU, GSR7002AU

Wesbart also has a range of other cassettes designed to take different bags, the table below has the most popular range of blood bags.

Part Number	Compatible with:
CAS009	Baxter 4R9957 (750ml)
CAS010	Baxter 4R9955 (500ml)
CAS011	Baxter 4R9953 (250ml)
CAS014	Gambro DF700 (700ml)
CAS030	Origen CS500 (500ml)

Visit our website (www.wesbart.co.uk) for further details, prices and ordering.

If you have a blood bag that is not listed or require a bespoke design, please contact us via our website to request a quotation as we can design and manufacture a cassette to suit. (Please see page 28 for cassette frames).

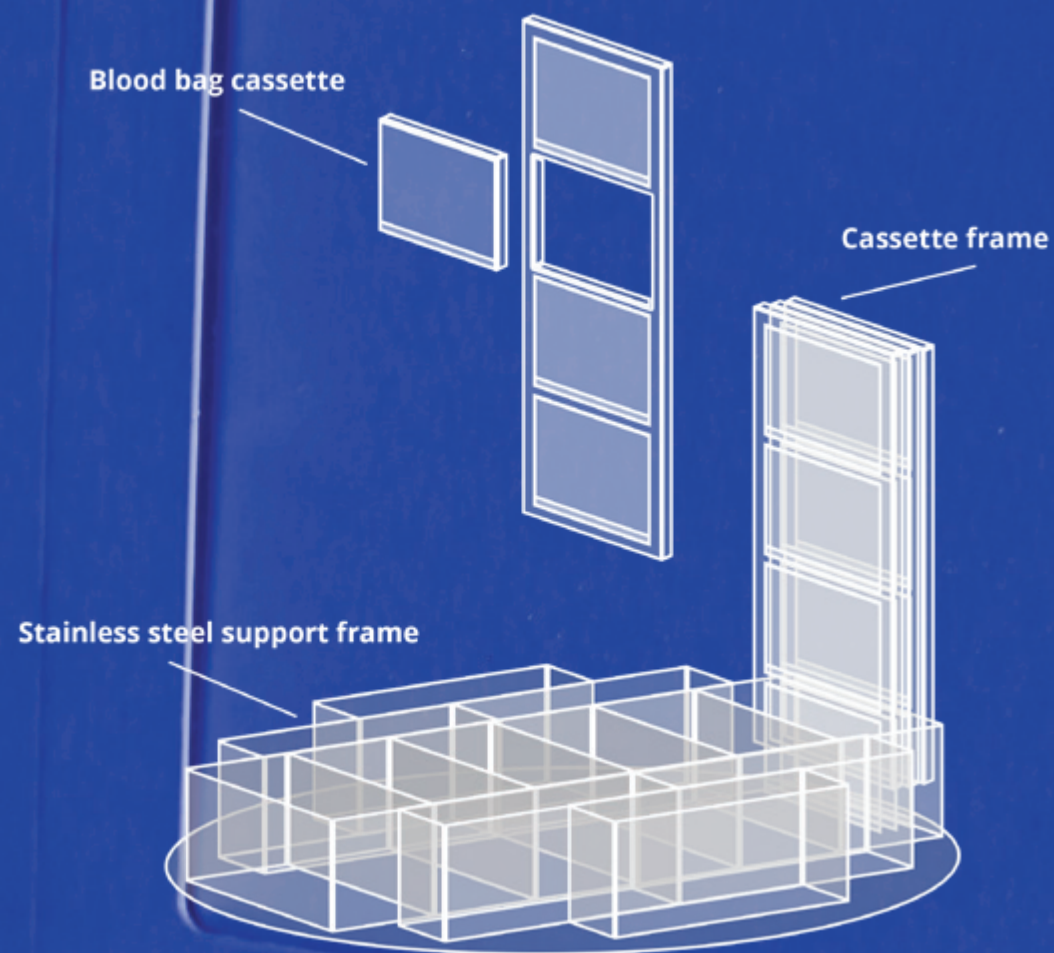

Side wing cassette closed

Side wing cassette open

Top wing cassette closed

CASSETTE FRAMES

Cassette carriers are designed to hold blood bag cassettes in liquid nitrogen vessels. Each blood bag is stored in an individual cassette which is placed into the rack. Racks are manufactured from lightweight anodised aluminium.

All racks have a handle on the top and are supplied with a lifting rod to easily remove the rack from the vessel. Racks can be supplied with locking bars or spring clips to hold the cassette in position. Racks have the option of plastic engraved numbered labels to be fitted to the handles to easily identify the required rack.

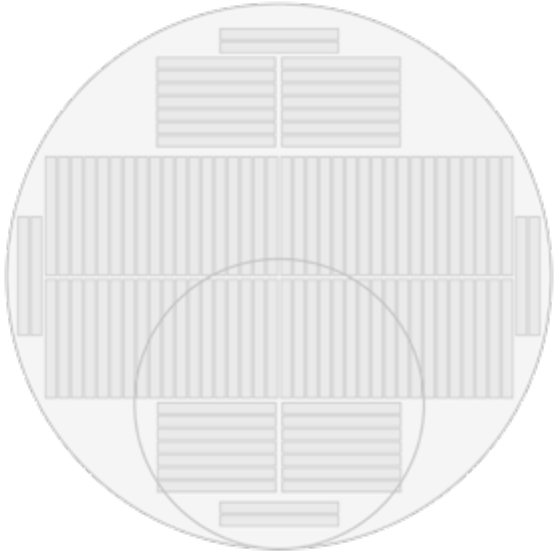

Vessel	Blood Bag Size	Cassettes per rack	Cassettes per vessel	Racks Per Vessel	Part Number

	500ml	6	1560	260	LR010/6
	750ml	6	1392	232	LR009/6

Cryogenic support frames are also available to hold racks in position. These are recommended if the vessel is holding a larger quantity of racks.

Rack layouts can be provided to show how many racks will fit in a preferred vessel. It is possible to mix the use in a vessel to hold different size cassette racks and cryobox racking.

The table above shows the capacities to store 250ml, 500ml and 750ml blood bags in Taylor Wharton/ Worthington vessels.

Should you have a vessel from an alternative manufacturer or require a bespoke solution please contact us via our website www.wesbart.co.uk

Rack layout for storage of **LR009/5** in Worthington 24K / Taylor Wharton 24K

Aluminium cassette rack **LR009/5**

HANGING ROD RACKS

These racks are manufactured from anodised aluminium and feature a carbon insulated stainless steel hanging rod designed to hook over the neck of the vessel. Racks are ideal for storing 2inch or 4inch boxes, racks are also available to store goblets, cassettes or blood bags.

These racks are supplied with locking bars, racks are also available with spring clips. Polycarbonate boxes supplied with the racks have 10x10 dividers to hold 1.2ml or 2.0ml vials with internal treads. 9x9 boxes are also available.

Thermo Locator 4 plus	10	4	VC454/10	VC454/10B
Thermo Locator 6	10	6	VC454/10	VC454/10B

Visit our website (www.wesbart.co.uk) for further details, prices and ordering.

Should the rack for your vessel not be listed please contact us for a quotation.

Locking systems on the racks include locking bars spring clips or front lips to hold the boxes in place.

PIE SHAPED RACKING SYSTEMS

Pie shape racking is an excellent way to maximise the storage capacity of your cryogenic vessel. The design of the pie rack can increase sample capacity compared to the usual 10x10 box racking. These racks hold pie shaped trays which can be fitted with single platform inserts or dividers to hold 1.2ml or 2.0ml vials. Racks are fitted with a locking bar to stop the trays falling forwards when the rack is removed from the vessel. All racks are stamped on the top face with letters and trays are numbered to easily locate the samples within the vessel.

This rack system is suitable for liquid or vapour phase vessels, either a base plinth is provided for vapour phase storage, or the bottom apertures in the rack are blocked off to keep the samples above the liquid level.

Replacement plastic or aluminium inserts are available for selected systems.

Vessel	Insert / Divider	Capacity (1.2/2.0ml vials)	Part Number	Base Plinth

CONSUMABLE GOODS

Wesbart has recently expanded its range of consumable goods that are available. Wesbart offers a range of items including cardboard and plastic cryoboxes, cryogenic vials, petri dishes and specimen storage jars. For a larger range of items, prices, special offers and ordering please visit our website. (www.wesbart.co.uk)

CRYOGENIC VIALS

Cryogenic Vials are gamma sterilized and available in resealable bags. They are supplied RNase-/DNase-/DNA- and pyrogen free.

They are made from polypropylene with a temperature range from -196 °C up to +121 °C allowing storage in the vapour phase of liquid nitrogen. Available in internal and external thread with star-base foot allowing free-standing storage. All vials can be colour-coded due to cap inserts (*see below*).

Part Number	Capacity	Dimensions (di x h)	Packing Quantity	Thread Design	Price
CV/1EXT	1.2ml	12.5mm x 35mm	25	External	£3.10
CV/2EXT	2.0ml	12.5mm x 47mm	25	External	£3.38
CV/5EXT	5.0ml	12.5mm x 90mm	10	External	£1.74
CV/1INT	1.2ml	12.5mm x 42mm	25	Internal	£5.37
CV/2INT	2.0ml	12.5mm x 49mm	25	Internal	£5.51
CV/5INT	5.0ml	12.5mm x 91mm	10	Internal	£3.04

COLOURED INSERTS

Coloured inserts are available in blue, yellow, green, red, orange, white or assorted. These can be ordered in quantities of 100 to be used with all the variations of cryo vials listed above. For prices and ordering please visit our website at www.wesbart.co.uk

CRYOGENIC VIAL RACK

Polycarbonate Cryogenic Tube Racks are available in blue, yellow, green, red and white. They are designed to hold any of the cryogenic vials mentioned above in a format of 5 x 10. The star foot design on each tube will lock in when stored, preventing the vial from rotating when tightening and unscrewing, allowing single handed operation for speed and efficiency. Temperature range from -196 °C up to +121 °C. Dimensions (W 195mm x D 100mm x H 25mm). For prices and ordering please visit our website at www.wesbart.co.uk

TUBE RACK (WITH LID)

Tube racks are made from polypropylene which is temperature resistant from -130 °C up to +121 °C. It features an alphanumeric ID code and is able to store microcentrifuge tubes, 96 x 1.5/2.0mm on one side or 96 x 0.5mm on the reverse. A range of colours are available including natural, blue, yellow, green, orange and pink. Dimensions (W 220mm x D 130mm x H 47mm). For prices and ordering please visit our website at www.wesbart.co.uk

SPECIMEN STORAGE JARS

Specimen storage jars are made from polycarbonate with a white polypropylene lid. They are high impact resistant and stackable. They are available in four sizes (see table below).

Part Number	Capacity	Height	Lid Size	Price
SJ/125	125ml	74mm	70mm	£3.48
SJ/250	250ml	119mm	70mm	£4.08
SJ/500	500ml	86mm	120mm	£6.40
SJ/1000	1000ml	142mm	120mm	£7.50

To see our full range of consumable goods please visit www.wesbart.co.uk and order online. Prices correct at time of printing, subject to change.

All racking is suitable for cryobxes with an external footprint of 133 x 133mm. All front access racks include trays with handgrips.

If you require bespoke racking for the storage of centrifuge tubes, bottle and microtiter plates please contact us for a quotation. Whatever your racking requirements we will have a solution for you to maximise the use of your freezer.

EPPENDORF F740 (3 SHELF)

Wesbart offers a large range of racking to make the most of the space available with the Eppendorf F740. This new freezer will hold up to 576 standard 2inch cryoboxes. That’s 57,600 2ml samples 7,200 more than the U725.

Below are details of the racking to store 2, 3 or 4 inch cryoboxes along with details for horizontal drawer systems and storage bins, ideal for organising loose items. Wesbart racks are available in aluminium or stainless steel.

We pride ourselves on the quality of our workmanship and products. All our racks have no sharp edges or corners and are designed to last the lifetime of your freezer. We are so confident with the quality and durability of our products we are the only racking manufacturer to offer a 3-Year warranty.

STORAGE BINS

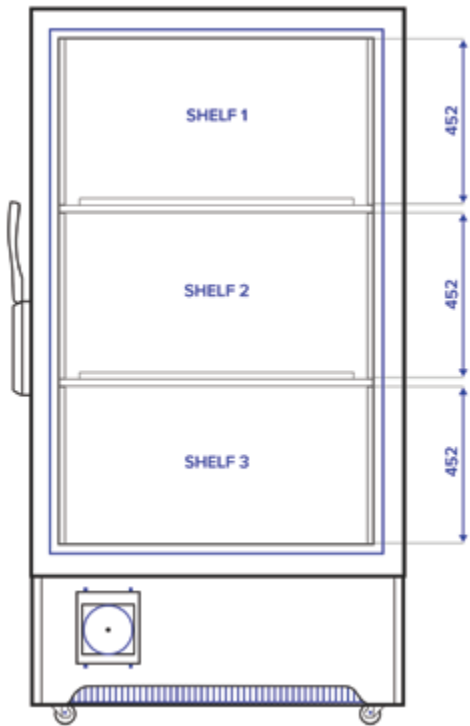

Bins Per Shelf	Bins Per Freezer	Dimensions (mm)	Part Number
4	12	410H x 205W x 560D	BIN 595

HORIZONTAL DRAWER SYSTEMS

Units Per Shelf	Drawer Per Rack	Dimensions (mm)	Part Number
6	2	420H x 140W x 560D	AH179/2DR
6	3	420H x 140W x 560D	AH179/3DR
4	2	420H x 205W x 560D	AH178/2DR
4	3	420H x 205W x 560D	AH178/3DR

All racking is suitable for cryobxbs with an external footprint of 133 x 133mm. All front access racks include trays with handgrips.

If you require bespoke racking for the storage of centrifuge tubes, bottle and microtiter plates please contact us for a quotation. Whatever your racking requirements we will have a solution for you to maximise the use of your freezer.

EPPENDORF F740 (5 SHELF)

Wesbart offers a large range of racking to make the most of the space available with the Eppendorf F740. With the 5-shelf option, you are still able to store 528 standard 2 inch cryoboxes, 24 more than the U725. With the shelf arrangement of this freezer it is best suited to store a range of different height cryoboxes. With the bottom shelf (shelf 5) holding a different size rack.

Below are details on racking to store 2, 3 or 4 inch cryoboxes along with details for horizontal drawer systems and storage bins, ideal for organising loose items. Wesbart racks are available in aluminium or stainless steel.

We pride ourselves on the quality of our workmanship and products. All our racks have no sharp edges or corners and are designed to last the lifetime of your freezer. We are so confident with the quality and durability of our products we are the only racking manufacturer to offer a 3-Year warranty.

PHCBI (PANASONIC)

The following pages show the part numbers of racking to fill various PHCBI upright and chest freezers, all racks are to hold boxes with a maximum footprint of 133mm x 133mm. Due to the design of PHCBI upright freezers the internal compartments can be different dimensions, because of this two different racks may need to be purchased to fill the freezer. All front access racks come complete with trays which feature handgrips. Should you require a bespoke design rack please complete a quotation request on our website.

NEED BESPOKE RACKING?

Should you require a bespoke rack for your freezer, Wesbart are able to design and manufacture any rack to meet your specification. We can offer custom racking for microtiter plates, deep well plates and cryoboxes of any size. We will work with you by gathering dimensions and requirements, allowing us to create custom racking that will maximise the use of your freezer, based on your specific needs.

If you require bespoke racking, or racking for a freezer that isn't shown in this guide, please contact us via our website at www.wesbart.co.uk.

CRYOGENIC REFERENCE GUIDES

On the following page is a comprehensive range of products for Statebourne Cryogenics, CBS, Worthington / Taylor-Wharton and Chart MVE cryogenic vessels. All racks are supplied with spring clips to hold the boxes in place, items are available in aluminium or stainless steel, see website for prices and ordering. Should you require a bespoke design rack please complete a quotation request on our website.

STATEBOURNE CRYOGENICS

The following table shows the part numbers of racking to fill various Statebourne cryogenic vessels, all racks are to hold 2 inch cryoboxes. Should you require a bespoke design rack please complete a quotation request on our website.

TERMS & CONDITIONS

Prices

Prices shown online and in this catalogue are correct at the time of printing but are subject to change at any time without notice. Goods will be invoiced at the prices on the date of despatch. All prices exclude carriage, VAT and import duty or taxes where applicable.

Quotations

Quotation prices are valid for up to 60 days from the date of the quotation.

Delivery

Wesbart UK Limited take no responsibility in the case of a delay or non-delivery. Deliveries from stock are subject to the items remaining unsold on the receipt of order. All claims regarding shortages and errors must be received by Wesbart UK Limited in writing within 48 hours. All orders dispatched by Wesbart UK Limited are shipped DAP (incoterms 2010).

Damage and Transit Loss

Wesbart UK Limited cannot be held responsible for breakage or loss in transit of any item despatched by the company. In the event of such loss both the carriers and Wesbart UK Limited must be advised in writing within 48 hours from the despatch date. In case of any item arriving damaged Wesbart UK Limited should be advised in writing within 48 hours.

Illustrations & specifications

All products featured in this catalogue and online are subject to change in respect of design, material thickness, quality and size by Wesbart without notice. Images are for illustration purposes only and may not represent part number specification or description. All images in this catalogue remain the property of Wesbart UK Limited and should not be copied or edited without written consent from the management of Wesbart UK Limited.

Responsibility

Wesbart UK Limited can only be responsible to supply the kind and quality of goods as ordered. It is regretted that Wesbart UK Limited cannot be liable for loss, damage, direct costs or indirect expenses arising from any item supplied by us. All goods supplied should be tested and examined on receipt. Wesbart UK Limited cannot be held responsible for incidental or consequential loss.

Warranty and Repairs

Wesbart UK Limited offers a 3-year warranty on all manufactured aluminium and stainless steel products. This warranty covers manufacturing defects with the product and by the specification it was supplied under. Wesbart UK Limited cannot be held responsible for damage or breakage caused by mistreatment of the products in use or by delivery.

Returns and refunds

Wesbart UK Limited will accept returns for stock items if unused and in new condition. Returns must be returned in the original packaging. Refunds are only available on stock items and are subject to approval by management. Wesbart UK Limited has the right to refuse a return or refund for whatever reason. All items which are returned are subject to a re-stocking charge of £50.00

Repairs

Repairs under warranty are free of charge. Repairs not covered by warranty will be estimated before any work takes place. Wesbart UK Limited take no responsibility for items which become damaged whilst being repaired. All goods returned to Wesbart UK Limited, (Daux Road, Billingshurst, West Sussex RH14 9YR, United Kingdom) to be repaired should be sent in suitable packaging with carriage (including any import taxes and charges) paid. A return letter listing any product defects should accompany the returned items including the sender's address, contact details and order number.

Terms of payment

All prices quoted by Wesbart UK Limited are nett. Our terms of trading are nett 30 days from date of invoice. All payments are to be made in pounds sterling. All goods remain the property of Wesbart UK Limited until payment is received in full. For online orders payment is required when order is placed.
